LogiMAT China 2024

LogiMAT China keeps working on exerting the advantages of the brand for the customers to create perfect presentations and efficient communication with each other. We all clear how vulnerable the business corporations - between people and companies worldwide - really are. We learned that international businesses and international supply chains are not as obvious and indestructible as we might have presumed. International business relationships and trusting corporations offer everyone involved a solid basis for the future.

Digitalization and automation, artificial intelligence (AI), intelligent warehousing, the Internet of Things (IoT), identification technology and software solutions, planning and process management as well as forklifts, AGVs, shuttles, racking and packing solutions will be displayed on LogiMAT China 2024. We build a safe, convenient and efficient show for you. Be part of this development and at be the forefront.

We are looking forward to meeting you at LogiMAT China 2024.

Exhibition Section

Materials Handling and Storage Technology

Storage and handling systems
Automation and control
Cranes and hoists
Continuous handling equipment
Lifts
Handling equipment
Conveyors
Luggage handling
Wheels and castors
Parts and accessories

Warehouse and Equipment

Shelves, shelving systems
Automated storage and retrieval systems
Shelf inspection and repair
Protection for columns and shelving
Order-picking equipment
Kanban and organizational solutions
Hall and tent construction
Partitions, in-plant offices, office containers
Hall floors and floor refurbishment
Hall and outdoor lighting
Cleaning equipment for warehouses and storage facilities
Heating and air-conditioning systems
Ladder systems
Industrial doors, door seals
Work mats
Workstation systems
Storage and floor-marking systems
Floor protectors and dirt-trapping mats
Hazardous goods storage and handling

Warehouse and Production Controls / Robotics

Control systems and equipment
Production robots
Manufacturing execution systems
Fine planning
Workforce planning
ERP and PPS systems
Planning and development
Research and technology

Packaging, Weighing, Measuring, Franking

Reusable and non-reusable packaging
Export and industrial packaging
Container management
Padding materials and edge protectors
Packaging material
Pallets
Packaging and unpacking machines
Pallet inverters and dispensers
Palletizing robots
Shrink and stretch systems
Strapping systems
Weighing and metering equipment
Measuring equipment and systems
Franking systems
Packaging development and consulting

Loading Technology and Systems

Loading ramps, loading bridges
Hydraulic platforms, lifting tables, adjustable ramps
Transshipment equipment
Loading and unloading equipment
Security technology for loading zones
Cargo securement
Tensioning straps and chains
Anti-slip mats
Anti-slip pallets
Ram-protection products

Retrofitting

Warehouse systems
Crane systems
Conveyor systems

Industrial Trucks and Accessories

Forklift trucks
Stacker guidance systems
Pallet stackers
Automated guided vehicles (AGV) / AMR
Electric vehicles
Tugger trains and trailers
Ancillary equipment for stackers
Wheels and castors
Parts and accessories

Information and Communications Technology

Supplier relationship management (SRM)
Customer relationship management (CRM)
Integration
Consignment tracking and identification systems
Sensor solutions and systems
Telecommunications
Human-machine communication
Cloud services and solutions
Supply chain software
Fleet management systems
Vehicle communication
Video tracking and monitoring

Order-picking Systems

Automatic order-picking
Pick-by-voice
Pick-by-light
Pick-by-color
Pick-by-scan
Pick-by-weight
Pick-by-vision, smart glasses
Gesture-controlled picking
Electronic picklist
Commissioning trolleys

Labelling and Identification

Identification systems
Printed labels and labelling equipment
Auto ID / RFID / NFC / barcodes
Labels, ink, supplies
Transponder technology
Mobility
UMTS, GPRS, Wi-Fi
Hardware/readers

Simulation Software

Supply chain simulation
Simulation of manufacturing scenarios
Simulation-supported production fine-planning
Robot simulation
3D simulation solutions
Strategic consulting

Storage System Software

Warehouse management software
Storage control systems
Data transmission
Hardware

Shipping and Transport Software

Fleet management
Route planning
Freight cost management
Forwarding software
Dispatching software
Customs and dispatching software

Stock Management, Inventory and Archiving Software

Inventory-taking
Stock management
Controlling
Document management
Archiving

Drive Technology

Engines and motors
Gearboxes and clutches
Bearings

Energy, Environmental Technology, Recycling, Waste Disposal

Energy supply and management
Renewable energies
Batteries, battery management, rechargers
Waste treatment
Exhaust and wastewater treatment
Compaction systems for recyclables
Feeder systems

Security

Building and site security
Workplace safety
IT security
Fire safety

Outsourcing Partners

Logistics service providers
Storage
Recruiting
Freight distribution centers
Facility cleaning
Data centres (EDI/ASP)
General contractors

Logistics Facilities

Logistics sites
Site location consulting
Logistics properties
Insurance
Financing

Consulting, Planning, Implementation

Management and logistics consulting
Personnel consulting
SAP consulting and integration
Financing, leasing, rental
Insurance

Public Authorities, Organizations, Education, Media

Trade associations
Colleges and universities
Other educational institutions
Institutes
Media
Clusters

Spark your solution

“

We achieve our target in LogiMAT China 2023. Our team got many inquiries from foreign visitors on site. And we invite some part of potential clients to visit our factory. Hope LogiMAT becomes even in the future.

”

 **MIMA 米玛**

“

Our products attract many visitors and many of them tried to drive our forklift. Our company and products get recognition by many people.

”

 **AGILOX**

“

We invited some of our clients from east and South Asia, they feel the exhibition is professional. We presented our company and products in the forum, that attracts many visitors interested in our products.

”

智芯科技

“

Many thanks for organizer's invitation. We exhibit our new products and technology solutions for professional visitors. LogiMAT show is a very good platform for us to expand our brand and company. Thanks again for this opportunity to join LogiMAT China!

”

We invite domestic and abroad industry experts to analyze the industry status or new development path from practice, multi-dimensional, and deep discussion.

The forum focuses on the integration, sustainable and reasonable use of resources, the safety of internal logistics processes, cooperation & sharing and accurate matching between a variety of complex solutions, reducing costs, increasing efficiency and other industry issues.

Why Shenzhen

Industrial layout of 11 cities in the Guangdong-Hong Kong-Macao Greater Bay Area(GAB)

Four Pillar Industries in Shenzhen

The High-tech Industry

In 2021, there were more than 20,000 high-tech enterprises in Shenzhen, of which over 2,000 are state-level high-tech enterprises.

The Modern Logistics Industry

In 2021, the added value of Shenzhen's logistics industry was RMB308.4 billion, taking up over 10% of the GDP.

The Financial Industry

Shenzhen is one of China's three major financial centers. In 2022, the added value of its financial industry exceeded over RMB510 billion, taking up 15.9% of the GDP.

The Culture and Creative Industry

Shenzhen took the lead in China in establishing the strategy of "developing a city based on culture". In 2022, the added value of culture and creativity industry was RMB255.6 billion, accounting up to 8.37% of the GDP.
